# Welcome to ISM Waste & Recycling

At ISM Waste & Recycling, we make waste management simple and reliable.

Whether you're a small business or a large organisation, we're here to handle your waste needs in a straightforward, effective way. With our extensive services across Greater Manchester and Lancashire, we offer a practical solution for all types of business waste, tailored to suit your unique requirements.

From general waste collections to recycling ISM is equipped to support you in keeping waste manageable and ensuring you stay compliant with the latest regulations.

# General Waste Services

With ISM's general waste services, managing everyday waste is simple and efficient. We collect all types of non-recyclable waste for businesses of all sizes so you can keep your site clear and organised. Our team works with you to set up a schedule that fits seamlessly into your operations, ensuring timely collection without disrupting your day.

All general waste is handled in line with local regulations, providing a responsible way to manage and dispose of your waste safely. Trust ISM to make your waste disposal hassle-free and compliant.

# Dry Mixed Recycling Services

Our dry mixed recycling (DMR) service helps you separate and dispose of common recyclable materials easily. We collect paper, cardboard, plastic, and metal together, streamlining your recycling process so you can focus on what matters.

By using our DMR service, you're not only cutting down on landfill waste but also supporting a greener approach to business waste management.

We provide clear guidance on what goes in the DMR bin, making it easy for your team to follow recycling best practices. ISM's recycling services keep it simple, effective, and environmentally conscious.

# Food Waste Collections

DEFRA plans to introduce the Simpler Recycling initiative to standardise non-residential recycling across the country.

This Simpler Recycling legislation requires that businesses, schools, hospitals, and other non-domestic premises have to recycle specific materials in separate bins, including food waste, glass, metal, plastic, paper, and cardboard where quantities exceed 5kg per week of the recyclable materials. The legislation excludes garden waste and plastic film for now.

## The legislation requires businesses to:

- 1 Separate dry recyclables into dedicated containers.
- 2 Collect food waste separately.
- 3 Start a mixed recycling collection.

# Confidential Waste Services

ISM's confidential waste services ensure that sensitive information is disposed of securely. We handle everything with the utmost care, from client records to business documents.

## Glass Collection Services

ISM's glass collection service provides easy disposal for glass waste, including bottles and jars. We'll work with you to set up reliable collections, helping you manage glass waste efficiently and sustainably.

# Wood Collection Services

Our wood collection service simplifies disposal for pallets, timber, and untreated wood. We'll collect, process, and recycle your wood waste, keeping your site clear while reducing environmental impact.

## Paper & Cardboard Recycling Services

ISM's paper and cardboard recycling services offer straightforward collection and processing, keeping your business organised and reducing landfill waste through easy recycling practices.

# WEEE Services

ISM's WEEE service handles your electronic waste safely and compliantly. We collect items like computers and office electronics, ensuring secure disposal and recycling where possible.

## Hazardous Waste Services

Our hazardous waste service provides a secure disposal solution for chemicals, oils, and other dangerous materials, ensuring compliance with safety standards while protecting the environment.

## Scrap Metal Services

We handle scrap metal collection, from construction materials to old equipment, recycling it efficiently to support a greener, more sustainable operation. ISM makes metal waste disposal simple.

We hope you found this guide helpful.
